

a foundation for your future

You want to set your medical group up for success. Switching to athenaOne could help you take your business to the next level.

Proven financial and clinical performance*

3+

hours saved per week per physician with automated scheduling and outreach

74%

of providers close encounters the day of the visit

94%

of claims favorably adjudicated after one billing event

Position your business for growth

The athenaOne suite of services connects your practices to one another and to providers across the country through a single network. Every customer on athenaOne is on the same cloud-based instance of our EHR, revenue cycle management, and patient engagement services to ensure your experience is consistent and always up to date. So when you add a new department or a new location, it's easy for your technology to scale with you, with no local server installation required.

Free up your staff to focus on higher-value work

athenaOne's revenue cycle management and patient engagement services reduce your staff's administrative workload and offer patients the conveniences that today's consumers expect. With less busywork, your staff can take on more valuable tasks – including assisting providers so that they can focus on time with patients. Support your staff with capabilities such as:

- Automatic eligibility checking
- Artificial intelligence that matches inbound faxes and results to the right patient chart
- Automated phone, text, and email outreach to patients
- Custom patient outreach campaigns to schedule appointments, collect patient payments, and more
- A mobile-friendly patient portal for provider communication, prescription refill requests, and online payments

Reduce click fatigue and improve provider satisfaction

Thousands of providers across the country trust athenahealth services to help them deliver care with fewer clicks, screens, and headaches. The athenaClinicals EHR allows providers to work more efficiently while maintaining control of the care decisions that impact patient outcomes through capabilities such as:

- Custom text macros
- Mobile workflows
- Dictation and/or voice recognition
- Queuing up order sets and encounter plans
- Delegating work to other providers or staff
- Easy access to patient records from other care sites

athenaOne for Medical Groups

Connect to the knowledge and tools

But athenaOne is more than just a suite of athenahealth's services. At its foundation is a platform with pre-built connections to everything else you need to run a medical group:

- 400,000+ interfaces to pharmacies, labs, imaging centers, and other healthcare providers across the country
- 250+ third-party applications in the athenahealth Marketplace that meet your unique organizational or specialty needs
- 580+ APIs and supporting documentation so you can build your own solutions on top of our platform
- Connections to payers and a lockbox service that connects directly to our offices, allowing us to post payments on your behalf and you to cut out the middleman
- Continuous updates to your athenaOne services throughout the year, free of charge – helping you stay current with industry changes as they happen instead of waiting 18–24 months for a software upgrade

SUCCESS STORY:

HealthStar Physicians, P.C.

Challenges

- Insufficient billing and clinical workflows
- Challenged with the transition to value-based care
- No visibility into performance across practice
- Lack of scalable, low-cost health IT to support growth

Results

- Increased physician and administrative productivity with more time for patient care
- Days in accounts receivable reduced to 26
- Claims rejection dropped from mid-teens to 3%
- \$1M+ in bonus payments from quality programs
- Real-time visibility into clinical and financial performance
- Actively adding practice locations and providers

at a glance:

12 locations in 4 countries

47 physicians

37 mid-level providers

475+ support staff

16 specialties

330,000 patients served
